- Close 13" wide X 20" high up to 60 degrees right
- Special packaging
- Stocking programs

We stock a broad inventory of structural material with the ability to cut it to length and perform cuts from 90 degrees to 45 degrees on either axis. We offer tees, angles, beams, and channels as well as squares, rectangular, round tubes, and pipe. Our extensive network can provide "hard to find" sizes and grades. We routinely stock, handle, and cut Carbon, Stainless, Alloy, and Nickel products. From production cutting to unique cuts, our saws are capable of maintaining close tolerances and providing the quality parts that our customers have come to expect. In addition, we can deliver material quickly using our own trucks. Contact our knowledgeable sales staff to learn more about the products and processes that Minerd & Sons, Inc. has to offer.
